 Contract # U1032
 Delivery System Design-Bid-Build
 Ownership Local Government
 Note NPPH32

Feature The general scope of this guaranteed savings contract project is to provide a surface water treatment plant WTP with a rated capacity of 50 million gallons per day. The WTP will be constructed on a property adjacent to the existing WTP and east of Waterworks Road. The project generally includes, but is not limited to, replacement of the existing raw water screening and pumping equipment, new raw water pipelines to the project site, powder activated carbon storage and feed, sodium permanganate storage and feed, raw water flow monitoring, pre-treatment with 3-stage flocculation and plate settler basins, ozone generation equipment and ozone contact basins, gravity filtration with biologically active dual media, clearwell disinfection and storage, high service pumping and flow monitoring, chemical storage and feed facilities, process residuals handling and disposal systems, and a new administration building with offices, laboratories, maintenance garage, conference rooms, and other features. Provide all ancillary work such as electrical and standby power equipment, instrumentation and controls systems, demolition, site preparation and excavation, concrete and form work, piping and valve systems, site and underground utility work, equipment installation and commissioning, road construction, site security features, landscaping and other required construction associated with the Project.
